## Skills Practice: Sets

1. Set $A=(2,4,6,8,10)$ and Set $B$ is the set of all prime numbers less than 20 . Complete the Venn diagram. The universe, the set of all possible outcomes, is the set of numbers 1 through 19.

Using the Venn diagram above, list the elements in each of the following sets:
a. $B$
b. $\quad A \cup B$
c. $\quad A \cap B$
2. Create a Venn Diagram to describe the following event: Rolling a die and flipping a coin (H1, T1, H2, T2, etc.)

Based on the Venn diagram, find the following probabilities:
a. $P(H)=$
b. $P(E)=$
c. $P(\mathrm{H} \cap \mathrm{E})=$
d. $P(H \cup E)=$
e. $\mathrm{P}(\overline{\overline{H \cup E}})=$
3. Suppose $P(A)=0.15$ and $P(B)=0.64$, find the following:
a. $P(\bar{A})=$
b. $P(\bar{A}-\bar{B})=$
c. $P\left(B^{\prime}\right)+P(A)=$
4. The Venn diagram below shows events $A$ and $B$ where $P(A)=0.5, P(\overline{A \cup B})=0.3$ and $P(A \cap B)=0.2$. The values $m, n, p$ and $q$ are probabilities.

a. Write down the value of $n$.
b. Find the value of $m$, of $p$, and of $q$.
5. If you draw an $M \& M$ candy at random from a bag of $M \& M$ 's, the candy you draw will have one of six colors. The probability of drawing each color depends on the proportion of each color among all candies made. Assume the table below gives the probability that a randomly chosen M\&M has each color.

| Color | Brown | Red | Yellow | Green | Orange | Blue |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Probability | 0.05 | 0.25 | $?$ | 0.15 | 0.20 | .10 |

a. Determine the probability of drawing a yellow M\&M. Justify your answer.
b. Determine the complement of drawing a red or yellow M\&M. Justify your answer.
6. The following shows a VENN diagram with the results of a survey a teacher gave to all of her students. It represents where all of the students have gone to eat over the last month.
a. What is the probability of randomly selecting a person from this group and picking a student that has NOT eaten at any of the restaurants OR they ate at McDonald's?
b. What is the probability of randomly selecting a person from this group and picking a student that has eaten at Mc Donald's OR Chick-fil-a?

7. The table represents the set of outcomes when 2 dice are rolled. Use the table to answer the following questions. Be sure to check for mutually exclusive events.
a. What is the probability of rolling two dice and having getting a sum of 4 OR getting a sum greater than 10 ?
b. What is the probability of rolling two standard number cubes to a sum that is even or a sum that is greater than 9 ?

|  | $\stackrel{\square}{1}$ | $\dot{\theta}_{2}$ | $\stackrel{\circ}{3}_{3}$ | $\because$ | $\because$ | $\stackrel{\square}{\square 0 \%}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\stackrel{\square}{1}$ | $\dot{(1,1)} \cdot$ | $\dot{(1,2)}$ | $\dot{(1,3)}$ | $\overline{(1,4)}$ | $\dot{(1,5)}$ | $\stackrel{\cdot}{(1,:=}$ |
| $\ddots_{2}$ | $\frac{\square, \cdot,}{(2,1)}$ | $\underset{(2,2)}{\square} \cdot \underset{\sim}{0}$ | $\underset{(2,3)}{0,0}$ |  |  | $\underset{(2,6)}{0, \ldots, \ldots}$ |
| $\square_{3}^{\circ}$ |  | $\because \cdot{ }_{(3,2)}$ | $\begin{aligned} & \because,{ }_{(3,3)} \\ & \end{aligned}$ | $\because, \cdot ;$ | $\because(, \because)$ | $\stackrel{\because}{\because(3,6)}$ |
| $\because$ | $\underset{(4,1)}{:!} \cdot$ | $\underset{(4,2)}{[:,}$ | $\underset{(4,3)}{\because B}$ | $\frac{: 3: 8}{(4,4)}$ | $\underset{(4,5)}{[: 8: 8)}$ | $\underset{(4,6)}{[::=:}$ |
|  | $\because, \dot{(5,1)}$ | $\because \quad \because,$ | $\begin{aligned} & \because \because, \\ & (5,3) \\ & \hline \end{aligned}$ | $\because,:$ | $\because \because, \because$ | $\because \because, \ldots$ |
| $\stackrel{100}{6}$ | $\underset{(6,1)}{\ldots: \cdot}$ | $\underset{(6,2)}{\ldots,]_{2}}$ | $\underset{(6,3)}{\overbrace{0}, \theta_{0}}$ |  | $\frac{\cdots, \cdot, 6}{(6,5)}$ | $\underset{(6,6)}{\ldots, \ldots, \ldots}$ |

8. Given, $P(A)=0.4, P(B)=0.3, P(A$ and $B)=0.1$, determine the probability of $P(A$ or $B)$ if the two events are inclusive (use either of the diagrams below to help you).

9. Given, $\mathbf{P}(\mathbf{A})=\mathbf{0 . 5}, \mathbf{P}(\mathbf{B})=0.4$, determine the probability of $\mathbf{P}(\mathbf{A}$ and $\mathbf{B})$ if the two events are mutually exclusive (use either of the diagrams below to help you).

10. Given, $\mathbf{P}(\mathbf{A})=0.5, P(B)=0.3, P(A$ or $B)=0.6$, determine the probability of $P(A$ and $B)$ if the two events are inclusive (use either of the diagrams below to help you)?

11. In the state of Oregon, all of the area codes start with a number greater than 4 and end in an odd number (e.g. 503-232-1235, $\underline{9} 71-923-5648$ ). Let A represent the set of all area codes that start with an even number. Let $B$ represent the set of all area codes that could be used in Oregon by the requirements stated earlier.

## Multiple Choice:

- Which might be an area code that belongs to the set $(A \cap B)$ ?
A. 403
B. 792
C. 892
D. 631
- Which might be an area code that belongs to the set $\left(A \cap B^{\prime}\right)$ ?
A. 403
B. 792
C. 892
D. 631

12. In a particular state, the first character on a license plate is always a letter. The last character is always a digit from 0 to 9 . Let V represents the set of all license plates beginning with a vowel, and 0 represents the set of all license plates that end with an odd number.

Which might be a license plate that belongs to the set $(V \cap O)$ ?
A. $\square$
B.

C. AROB BXE
D.

Which might be a license plate that belongs to the set $\left(V \cap O^{\prime}\right)$ ?
A. $\square$
B. WMA
c.

D.

Which might be a license plate that belongs to the set $\left(V^{\prime} \cap O^{\prime}\right)$ ?
A. E2G PCB
B.

C.
ADRO
D.
