

Cylinders

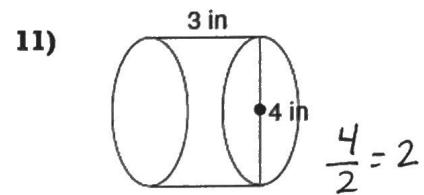

$$V = \pi r^2 h$$

$$\begin{aligned} V &= \pi(8)^2(7) \\ V &= 448\pi \text{ km}^3 \\ V &\approx 1407.43 \text{ km}^3 \end{aligned}$$

$$\begin{aligned} V &= \pi(11)^2(10) \\ V &= 1210\pi \text{ ft}^3 \\ V &\approx 3801.33 \text{ ft}^3 \end{aligned}$$

$$\begin{aligned} V &= \pi(2)^2(3) \\ V &= 12\pi \text{ in}^3 \\ V &\approx 37.70 \text{ in}^3 \end{aligned}$$

- 12) A cylinder has a volume of $360\pi \text{ in}^3$. If the cylinder has a height of 10 in., what is its radius?

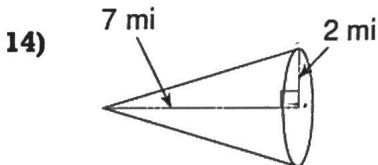

$$\begin{aligned} V &= \pi r^2 h \\ \frac{360\pi}{10} &= \pi(r^2)(10) \\ \cancel{\pi} \cancel{10} &= \boxed{r^2}(10) \\ \sqrt{36} &= r \\ 6 &= r \end{aligned}$$

- 13) A cylinder has a volume of 4580.442 m^3 . If the cylinder has a diameter of 18 m, find its height.

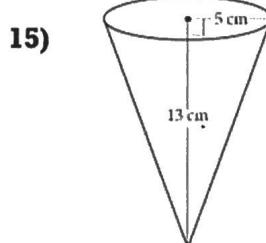

$$\begin{aligned} \frac{4580.442}{\pi} &= \pi(9)^2 \boxed{h} \\ V &= \frac{1}{3}\pi r^2 h \end{aligned}$$

$$\begin{aligned} \frac{4580.442}{\pi} &= \frac{81\boxed{h}}{81} \\ h &= 18 \text{ m} \end{aligned}$$

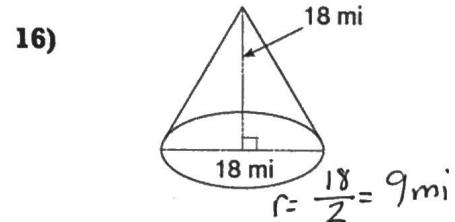

Cones

$$\begin{aligned} V &= \frac{\pi(2)^2(7)}{3} = \frac{28\pi}{3} \\ V &\approx 29.32 \text{ mi}^3 \end{aligned}$$

$$\begin{aligned} V &= \frac{\pi(5)^2(13)}{3} = \frac{325\pi}{3} \\ V &\approx 340.34 \text{ cm}^3 \end{aligned}$$

$$\begin{aligned} V &= \frac{\pi(9)^2(18)}{3} = \frac{1458\pi}{3} \\ V &\approx 1526.81 \text{ mi}^3 \end{aligned}$$

- 17) A cone has a volume of $121\pi \text{ ft}^3$. If the radius of the cone is 5.5 ft, find its height.

$$\begin{aligned} 3 \cdot 121\pi &= \pi(5.5)^2 \boxed{h} \cdot 3 \\ \cancel{3} \cancel{\pi} &= \frac{363\pi}{30.25\pi} = \frac{\cancel{\pi}(5.5)^2 \cancel{h}}{\cancel{\pi} 30.25\pi} \\ h &= 12 \text{ ft.} \end{aligned}$$

- 18) A cone with a height of 15 cm has a volume of 141.37 cm^3 . Find the diameter of the cone.

$$\begin{aligned} 3 \cdot 141.37 &= \pi \boxed{r^2} (15) \cdot 3 \\ \cancel{3} &= \frac{424.11}{\pi} = \frac{15\pi \boxed{r^2}}{\pi} \\ \frac{135}{15} &= \frac{15 \boxed{r^2}}{15} \\ \sqrt{\frac{9}{3}} &= \sqrt{r^2} \\ 3 &= r \end{aligned}$$

$$\begin{aligned} d &= 2r \\ d &= 2 \cdot \text{radius} \\ d &= 2(3) \end{aligned}$$
